

Amendments to the Claims

1. (Original) A composition comprising a mixture of:
  - a) an organosilane of the formula  $R_nSiX_{4-n}$ , wherein n is an integer of from 0 to 3; and R is, independently, a nonhydrolyzable organic group, and each X is, independently, a hydrolyzable group; with
  - b) an ether of the formula R-O-R, wherein R is, independently, an organic group, and the ether has a hydroxy functionality.
2. (Original) A composition comprising a mixture of:
  - a) an organosilane of the formula  $R_nSiX_{4-n}$ , wherein n is an integer of from 0 to 3; and R is, independently, a nonhydrolyzable organic group, and each X is, independently, a hydrolyzable group; with
  - b) an ether of the formula R-O-R, wherein R is, independently, an organic group, and the ether has a hydroxy functionality,  
wherein the ether is a glycol ether.
3. (Original) The composition of claim 2, wherein the ether is selected from dipropylene glycol butyl ether, propylene glycol butyl ether, and dipropylene glycol propyl ether.

4. (New) A composition comprising a mixture of:

a) an organosilane of the formula  $R_nSiX_{4-n}$ , wherein n is an integer of from 0 to 3; and R is, independently, a nonhydrolyzable organic group, and each X is, independently, a hydrolyzable group; with

b) an ether of the formula R-O-R, wherein R is, independently, an organic group, and the ether has a hydroxy functionality,

wherein the composition provides hydrophobic surface treatment to a glass surface treated with the composition.

5. (New) A composition comprising a mixture of:

a) an organosilane of the formula  $R_nSiX_{4-n}$ , wherein n is an integer of from 0 to 3; and R is, independently, a nonhydrolyzable organic group, and each X is, independently, a hydrolyzable group; with

b) an ether of the formula R-O-R, wherein R is, independently, an organic group, and the ether has a hydroxy functionality,

wherein the ether is a glycol ether,

wherein the composition provides hydrophobic surface treatment to a glass surface treated with the composition.

6. (New) The composition of claim 5, wherein the ether is selected from dipropylene glycol butyl ether, propylene glycol butyl ether, and dipropylene glycol propyl ether.
